MEMORANDUM FOR TARGET ORIENTED DISPLAY WORKING GROUP

The latest version of the Terms of Reference is being circulated under separate cover. For the most part, I think it is a faithful record of our meeting on May 29. I have made a few changes which I believe are purely editorial. In addition, the sentence on security has been placed in a separate section rather than as a part of the section on the contents of the final report. This change was made after consultation with the DCI representatives and, according to them, better reflects the spirit of their proposal. Personally, I go along with this change enthusiastically since, as I mentioned at the meeting, I don't believe that our group is the best one to consider security implications. Also, it is my understanding that these questions should be handled under the leadership of the DCI as they cut across many programs.

Within the next day or so, I will inform you about the next meeting.

A handwritten signature in dark ink, reading "Herbert Benington", is positioned above the typed name.

Herbert D. Benington
